## § 01 Education

### **Ph.D., Civil & Environmental Engineering**, Lehigh University

Aug 2024 – present · expected 2028

Complex Adaptive Water Systems (CAWS) Lab · Advisor: Prof. Y.C. Ethan Yang · Center for Catastrophe Modeling and Resilience (CMR)

**Dissertation:** *Advancing Coupled Human-Flood Modeling: From Empirical Foundations to LLM-Driven Multi-Agent Simulation*

Research: LLM-driven coupled ABM–catastrophe model framework for household flood adaptation; governed agent framework (WAGF) validating LLM agents against behavioral theory before they act; multi-agent systems for quantitative risk assessment.

### **M.S., Hydrological and Oceanic Sciences**, National Central University (NCU), Taiwan

Sep 2021 – Jun 2023

Surface Hydrology Group · Institute of Hydrological and Oceanic Sciences (IHOS) · GPA 4.3/4.3 · Dean's Award, College of Earth Sciences (Jun 2023). Thesis: groundwater flow characteristics of the Taoyuan coastal zone.

### **B.S., Earth Sciences**, National Central University (NCU), Taiwan

Sep 2017 – Jun 2021

GPA 3.9/4.3 · Best Undergraduate Student Project and Report (Nov 2020).

## § 02 Research Experience

### **Ph.D. Candidate** — Complex Adaptive Water Systems (CAWS) Lab, Lehigh University

Aug 2024 – present

- Co-authored the *Water Resources Research* (2026) article substituting large language models as the behavioral engine of a human–water simulation — published; second author of two.
- Building a governed LLM-agent framework (WAGF) with validation rules, execution control, and audit logs — agent decisions are checked against physical constraints and behavioral theory before simulation state updates; research software in preparation for release.
- Built a 52,141-household coupled agent-based × catastrophe flood model (27 census tracts, 2011–2023) with NFIP premium, payout, and deductible mechanics; simulated payouts validated against OpenFEMA insurance-claims data over 50 Monte Carlo runs (median + IQR).
- Designed and fielded a 937-household flood-adaptation survey (Passaic River Basin, NJ) and a survey-to-agent parameterization pipeline (structural equation modeling → Bayesian calibration) that turns empirical data into calibrated agent parameters.

### **Research Assistant** — Surface Hydrology Group, IHOS, National Central University

2023 – 2024

- 2D/3D groundwater numerical modeling and calibration for the Taoyuan coastal zone (HydroGeoChem); evaluated nature-based solutions for groundwater and watershed management.

### **Summer Research Intern** — National Science and Technology Center for Disaster

Summer 2022

Reduction (NCDR), Taiwan

- Processed IPCC AR6 downscaled climate-model ensembles for Taiwan; automated multi-model comparison pipelines (Python, MATLAB).

▷ Stable-isotope hydrology ( $\delta\text{D}/\delta^{18}\text{O}$ ), Feitsui Reservoir.

#### PEER-REVIEWED

[1] Yang, Y. C. E., & Chiou, W. (2026). Leveraging Large Language Models for Agent-Based Simulation of Human–Water System Interactions. *Water Resources Research*, 62(6), e2025WR042111.

doi.org/10.1029/2025WR042111 Published

#### MANUSCRIPTS UNDER REVIEW

[2] Chiou, W. Y., Yang, Y. C. E., Tanaka, T., Jamrussri, S., & Feng, S. Household flood adaptation and financial outcomes for homeowners and renters: A coupled agent-based and catastrophe flood modeling framework. *Journal of Hydrology*. Under review

[3] First-author manuscript — flood-adaptation decision pathways across marginalized and non-marginalized groups, identified via structural equation modeling. *Sustainable Cities and Society*.

Under review

#### CONFERENCE PRESENTATIONS

Chiou, W., Yang, Y. C. E., Tanaka, T., Jamrussri, S., & Feng, S. — “Modeling Long-Term Household Flood Adaptation under Social Heterogeneity: A Coupled Agent-Based Modeling Framework.” Poster NH41E-0449, AGU Fall Meeting 2025.

ISHC 2025, Tokyo, Japan — oral presentation 38-03, July 2025; co-authored with collaborators across Lehigh, FAU, Kyoto, and UTokyo.

AGU Fall Meeting 2023 — abstract; submarine groundwater discharge study combining electrical resistivity tomography, field observation, and numerical simulation.

§ 05 Research Interests

- LLM multi-agent systems
- Agent evaluation & governance
- Agent-based modeling
- Catastrophe modeling
- Human–water interaction
- Decision-making under risk
- Structural equation modeling

§ 06 Methods & Tools

AGENT SYSTEMS

LLM agents · multi-agent systems · structured prompting · validation rules · audit logs · simulation coupling

PROGRAMMING

Python · TypeScript · R · MATLAB · C++

SOFTWARE & TOOLS

Git · Jupyter · SPSS · AMOS · ArcGIS Pro

AI TOOLING

Claude Code · Codex CLI · Cursor · Ollama · MCP · plugin/skill development

§ 07 Research Software · LLM Agent Systems & AI Research Workflows

**research-hub**

AI-operable research workspace · PyPI v1.1.1 · Maintained open-source tool

An AI-operable research workspace for Zotero, Obsidian, and NotebookLM — search, ingest, and sync papers through one CLI, MCP server, and REST API. Listed in Awesome MCP Servers.

**FLOODABM**

Coupled ABM × CAT model · Research prototype, archived

A large-scale simulation (52,141 households) that quantifies human–flood interaction and insurance outcomes; Zenodo-archived companion code with CITATION.cff.

**codex-delegate**

AI research workflow tooling · Maintained open-source tool

Agent-delegation wrappers that verify change from git state, not the delegate’s own report; a regression test pins a real upstream failure. CI on Ubuntu and Windows.

**WAGF — Water Agent Governance Framework**

LLM-agent simulation governance · In preparation for release

A general framework for governed LLM agents, demonstrated in human–water simulation, that keeps coupled behavioral outcomes stable and physically sensible.

**agent-collab-skills**

Multi-agent orchestration · Maintained open-source tool

Multi-agent orchestration — task splitting, output reconciliation, adversarial debate, shared memory, and a pre-merge acceptance gate.

**ai-research-skills**

15-skill research catalog · 5-plugin marketplace · Maintained open-source tool

A 15-skill catalog that first vets whether a research idea is worth doing — open, a contribution, feasible — before design, build, and drafting run. Cross-runtime SKILL.md contract.

§ 08 Professional Service

Graduate Student Committee Member — Lehigh University, Dept. of Civil & Environmental Engineering

2025 – present

§ 09 Community & Open-Source

**awesome-agentic-ai-zh**

4.5k+ GitHub stars (July 2026)

Trilingual (zh-TW / zh-Hans / EN) 7-stage roadmap from LLM basics to production multi-agent systems; CI-enforced locale parity; external contributors.

**Open-source contributions**

10 merged pull requests in third-party open-source projects (BuilderIO/agent-native ×4, incl. a root-caused bug fix with a regression test; langchain-ai/openwiki security fix; ZhuLinsen/daily\_stock\_analysis ×3; Nanako0129/coralline; NVIDIA/skills).
