

Wenyu Chiou

Ph.D. Candidate · Civil & Environmental Engineering / Complex Adaptive Water Systems (CAWS) Lab, Lehigh University

My research develops governed LLM-driven agent and multi-agent systems for coupled human–water modeling — bridging empirical behavioral data, interpretable rule-based simulation, and large language models to study human–flood interaction and decision-making under risk.

§ 01 Education

Ph.D., Civil & Environmental Engineering, Lehigh University

Aug 2024 – present · expected 2028

Complex Adaptive Water Systems (CAWS) Lab · Advisor: Prof. Y.C. Ethan Yang · Center for Catastrophe Modeling and Resilience (CMR)

Dissertation: *Advancing Coupled Human-Flood Modeling: From Empirical Foundations to LLM-Driven Multi-Agent Simulation*

Research: LLM-driven coupled ABM–catastrophe model framework for household flood adaptation; governed agent framework (WAGF) validating LLM agents against behavioral theory before they act; multi-agent systems for quantitative risk assessment.

M.S., Hydrological and Oceanic Sciences, National Central University (NCU), Taiwan

Sep 2021 – Jun 2023

Surface Hydrology Group · Institute of Hydrological and Oceanic Sciences (IHOS) · GPA 4.3/4.3 · Dean's Award, College of Earth Sciences (Jun 2023). Thesis: groundwater flow characteristics of the Taoyuan coastal zone.

B.S., Earth Sciences, National Central University (NCU), Taiwan

Sep 2017 – Jun 2021

GPA 3.9/4.3 · Best Undergraduate Student Project and Report (Nov 2020).

§ 02 Research Experience

Ph.D. Candidate — Complex Adaptive Water Systems (CAWS) Lab, Lehigh University

Aug 2024 – present

- Co-authored the *Water Resources Research* (2026) article substituting large language models as the behavioral engine of a human–water simulation — published; second author of two.
- Building a governed LLM-agent framework (WAGF) with validation rules, execution control, and audit logs — agent decisions are checked against physical constraints and behavioral theory before simulation state updates; research software in preparation for release.
- Built a 52,141-household coupled agent-based × catastrophe flood model with NFIP premium, payout, and deductible mechanics; simulated payouts validated against OpenFEMA insurance-claims data.
- Designed and fielded a 937-household flood-adaptation survey (Passaic River Basin, NJ) and a survey-to-agent parameterization pipeline (structural equation modeling → Bayesian calibration) that turns empirical data into calibrated agent parameters.

Research Assistant — Surface Hydrology Group, IHOS, National Central University

2023 – 2024

- 2D/3D groundwater numerical modeling and calibration for the Taoyuan coastal zone (HydroGeoChem); evaluated nature-based solutions for groundwater and watershed management.

Summer Research Intern — National Science and Technology Center for Disaster Reduction (NCDR), Taiwan

Summer 2022

- Processed IPCC AR6 downscaled climate-model ensembles for Taiwan; automated multi-model comparison pipelines (Python, MATLAB).

Undergraduate Research Intern — Institute of Earth Sciences, Academia Sinica

Jul – Aug 2020

- Stable-isotope hydrology ($\delta D/\delta^{18}O$), Feitsui Reservoir.

CONFERENCE PRESENTATIONS

Chiou, W., Yang, Y. C. E., Tanaka, T., Jamrussri, S., & Feng, S. — “Modeling Long-Term Household Flood Adaptation under Social Heterogeneity: A Coupled Agent-Based Modeling Framework.” Poster NH41E-0449, AGU Fall Meeting 2025.

ISHC 2025, Tokyo, Japan — oral presentation 38-03, July 2025; co-authored with collaborators across Lehigh, FAU, Kyoto, and UTokyo.

AGU Fall Meeting 2023 — abstract; submarine groundwater discharge study combining electrical resistivity tomography, field observation, and numerical simulation.

§ 04 Awards & Fellowships

Dean’s Award, College of Earth Sciences — National Central University

Jun 2023

Interdisciplinary Research Fellowship (Hydrology/Geophysics/Geology) — NSTC, Taiwan · \$4,000 USD/year

2021 – 2023

Best Undergraduate Student Project and Report in Earth Sciences — National Central University

Nov 2020

Undergraduate Student Research Project Grant — NSTC, Taiwan · \$1,600 USD total

2020 – 2021

§ 05 Research Interests

- LLM multi-agent systems
- Agent evaluation & governance
- Agent-based modeling
- Catastrophe modeling
- Human–water interaction
- Decision-making under risk
- Structural equation modeling

§ 06 Methods & Tools

AGENT SYSTEMS

LLM agents · multi-agent systems · structured prompting · validation rules · audit logs · simulation coupling

PROGRAMMING

Python · TypeScript · R · MATLAB · C++

SOFTWARE & TOOLS

Git · Jupyter · SPSS · AMOS · ArcGIS Pro

AI TOOLING

Claude Code · Codex CLI · Cursor · Ollama · MCP · plugin/skill development

§ 07 Research Software · LLM Agent Systems & AI Research Workflows

research-hub

Research-literature pipeline · PyPI v1.1.1 · Maintained open-source tool
Local-first Zotero/Obsidian/NotebookLM pipeline with a fail-closed anti-fabrication gate — unverifiable references are quarantined, never silently accepted. CI across 3 OS × 4 Python versions.

FLOODABM

Coupled ABM × CAT model · Research prototype, archived
52,141-household flood-adaptation model with NFIP mechanics, calibrated on a 937-household survey; Zenodo-archived companion code with CITATION.cff.

codex-delegate

AI research workflow tooling · Maintained open-source tool
Cross-platform agent-delegation wrappers with anti-fabrication contracts; regression-tested against a real upstream failure; CI on Ubuntu and Windows.

WAGF — Water Agent Governance Framework

Multi-agent LLM governance · In preparation for release
Validates LLM-agent decisions with domain rules, behavioral-theory checks, retry feedback, and audit logs before simulation state updates.

agent-collab-skills

Multi-agent orchestration · Maintained open-source tool
Task splitting, output reconciliation, adversarial debate, shared memory, and acceptance gates for multi-agent runs.

ai-research-skills

Research workflow skills · Maintained open-source tool
Skill catalog for the research workflow — literature review, gap identification, feasibility scoping, manuscript writing, cross-agent delegation.

§ 08 Professional Service

Graduate Student Committee Member — Lehigh University, Dept. of Civil & Environmental Engineering

2025 – present

§ 09 Community & Open-Source

awesome-agentic-ai-zh

4.5k+ GitHub stars (July 2026)

Trilingual structured learning curriculum (zh-TW / zh-Hans / EN) — a staged roadmap from LLM basics to production multi-agent systems, with CI-enforced locale parity and externally contributed pull requests.

Open-source contributions

7 merged pull requests in third-party open-source projects (BuilderIO/agent-native ×4, incl. a root-caused bug fix with a regression test; Nanako0129/coralline; ZhuLinsen/daily_stock_analysis; NVIDIA/skills).
